

List of Electronics Projects Using Only ICs (No Microcontroller):

- 1. Traffic Light Controller using 555 Timer and CD4017**
- 2. LED Chaser Circuit (Knight Rider Effect)**
- 3. Digital Dice Game using CD4017**
- 4. Automatic Street Light using LDR and 555 Timer**
- 5. Water Level Indicator using Transistors and LEDs**
- 6. Sound-Activated Light using 555 Timer and Microphone**
- 7. Fire Alarm System using Thermistor and Op-Amp**
- 8. Clap Switch using 555 Timer**
- 9. Rain Water Detector with Buzzer Alert**
- 10. Sequential Lamp Flasher for Decoration**
- 11. Quiz Buzzer System using CD4017**
- 12. Simple Timer Circuit using 555 Monostable Mode**
- 13. PWM Fan Speed Controller using 555 Timer**
- 14. Overheat Protection System using LM35 and Comparator**
- 15. Infrared Remote Control Switch using TSOP and Flip-Flop**
- 16. Digital Counter with 7-Segment Display using 4026 IC**
- 17. Bike/Car Indicator Flasher Circuit using 555 Timer**
- 18. Light Fountain Circuit using CD4017**
- 19. Logic Gate Demonstration using 7400 Series ICs**
- 20. Emergency Light using LDR and Relay**
